

i3-TECHNOLOGIES

**i3RDM**  
Take control.

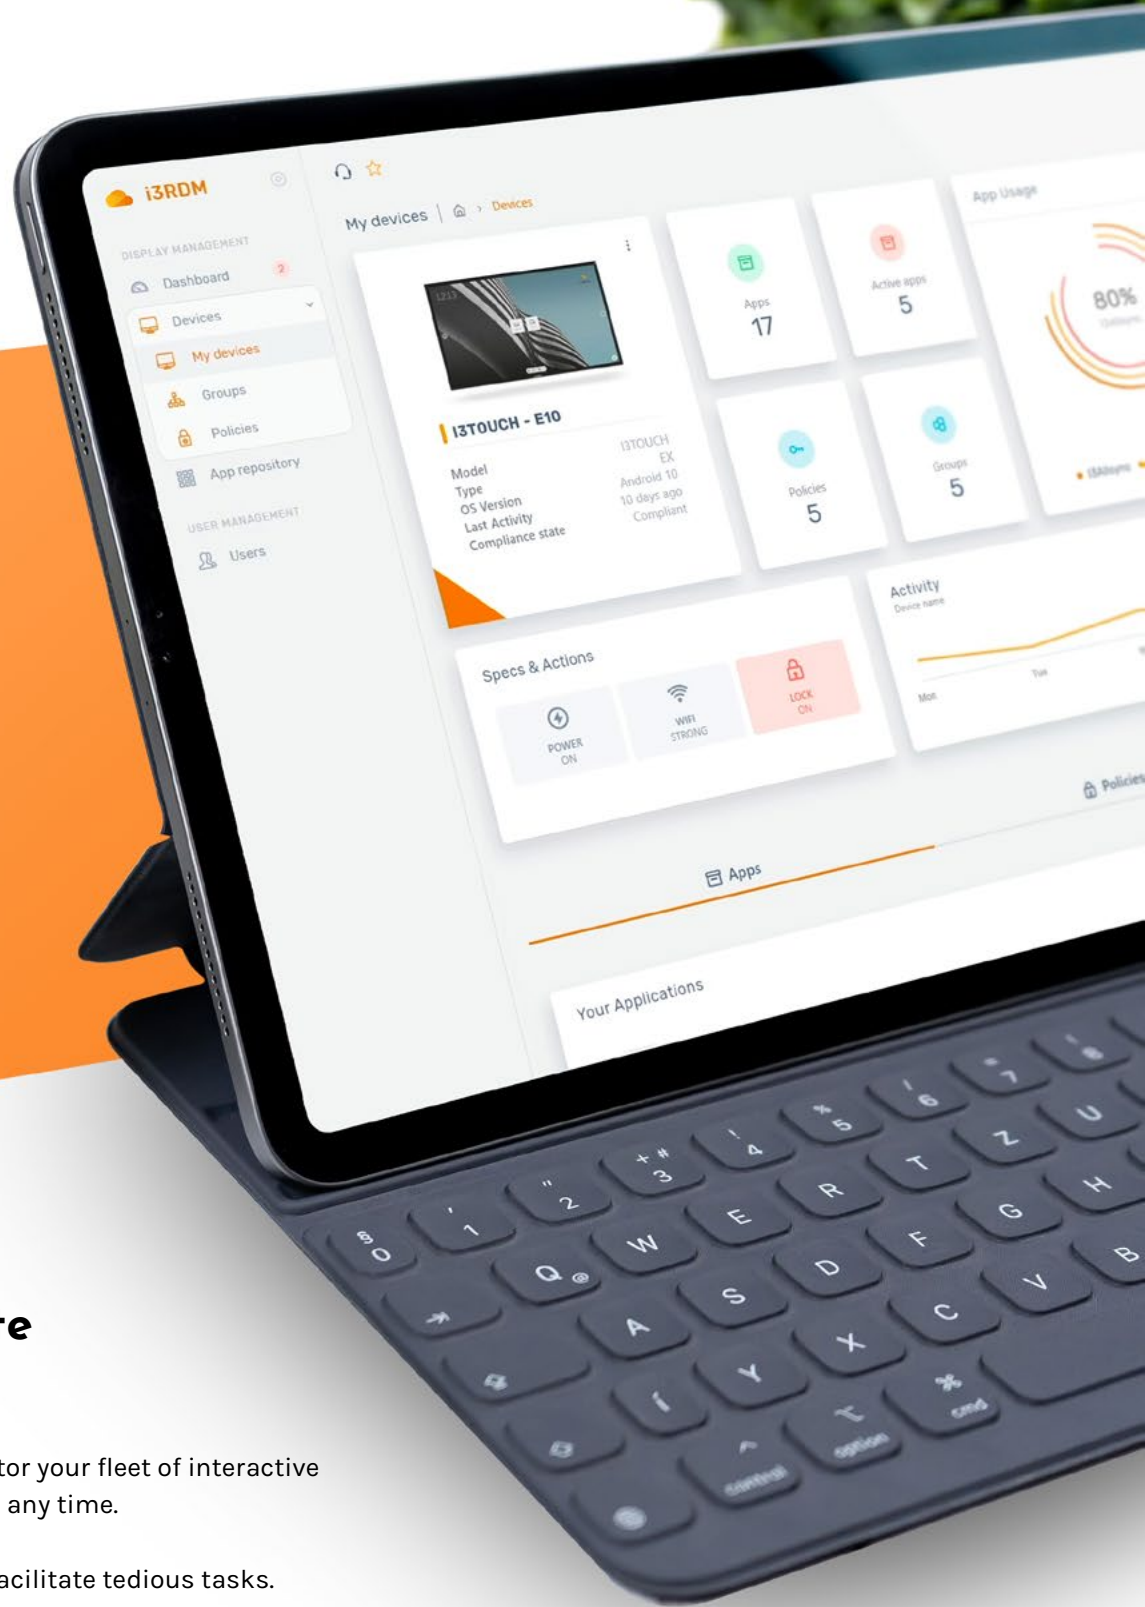

## Remote Display Management.

i3RDM enables support employees and IT administrators to manage and monitor an entire fleet of interactive flat panels from anywhere at any time ensuring them to always be in full control.

Acquire real-time data from the IFP and install and remove apps remotely so your organisation always has the latest apps available to use.

You can instantly deploy the apps and settings to a single device or to an entire device pool. i3RDM has specifically been designed for the IFP market and doesn't only work with our displays but with any Android-based touch display.

## Efficient remote management.

Manage, maintain and monitor your fleet of interactive flat panels from anywhere at any time.

Do less repetitive work and facilitate tedious tasks.

Ensure your devices are up to date and comply with company policy. Monitor device usage and adjust where necessary.

## **| Control multiple android displays, effortlessly.**

Enrollment of your interactive flat panels into i3RDM is simple and fast. All you need is an Android 7.0+ based interactive flat panel that is connected to the Internet.

Managing multiple displays has never been easier. Bundle devices and create groups with specific policies and settings.

i3RDM makes it easy for you to manage any size of display fleet.

## Full control at your fingertips.

i3RDM includes all the features you need to fully manage your display fleet remotely.

Discover our main features.

### Real-time data

Acquire real-time data from the interactive flat panel including an overview of installed apps, usage data, OS data, Android configuration, ...

### Update & remove apps

Have full control over the apps on a device, including the ability to remotely install and remove apps so your organization always has the latest apps available to use.

### Push apps

Upload and push your own apps to the interactive flat panel or push apps from within the i3RDM app repository or the apps available in the i3STORE.

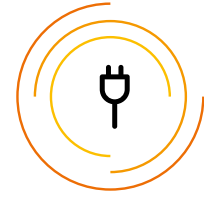

### Grouping & Policies

Group devices in the same department and instantly deploy the same apps and settings to the device pool, so that there is a standardized experience for everyone in that department.

### Notifications

Send out messages to one or multiple displays at once to notify your team about certain changes or updates.

### High compatibility

i3RDM is compatible with i3TOUCHEX, PX, PXr, but it can also work with interactive flat panels from other vendors as long as they are on Android 7.0 or higher.

### Security

i3RDM is compliant with the latest data security, data privacy (GDPR) regulation and meets all of today's infrastructure security requirements.

## System requirements

i3RDM will work on any device that is capable of running a modern browser. This means computers, tablets and almost all smartphones.

### Requirements display:

Android 7.0+

### Bandwidth:

For initial loading times under 20s, we recommend a bandwidth of 15Mbps (download) or higher.
